

Another Term For Comfort Zone

Steve Lue demythologised his explanation of the concept of the comfort zone, stating that it is not a place where one is safe, but a place where one is not growing. He argues that the comfort zone is a state of mind, not a physical location, and that it is often a result of fear or a lack of confidence. He suggests that the only way to overcome the comfort zone is to step out of it and embrace the unknown, even if it means facing failure. He concludes by stating that the comfort zone is a place where one is not growing, and that the only way to overcome it is to step out of it and embrace the unknown.
